# Content

## Introduction

## The Universe

# Dirk Deimeke (that's me)

- Born 1968 in Wanne-Eickel
- Linux since 1996
- Emigrated 2008 to Switzerland
- Taskwarrior Team since 2010

Entry point for more `https://d5e.org/`

# What the heck?

Why give a talk about the *Universe* of a task management application?

The answer is simple: Because there is so much more to explore apart from the flagship application Taskwarrior.

We have many more applications and an interesting ecosystem of tools and services.

# What the heck?

Why give a talk about the *Universe* of a task management application?

The answer is simple: Because there is so much more to explore apart from the flagship application Taskwarrior.

We have many more applications and an interesting ecosystem of tools and services.

**Timewarrior 1.0.0 Beta Release** 2016-07-25

Timewarrior 1.0.0 is in beta! Please download and give us feedback.

Download here:
timew-1.0.0.beta1.tar.gz

Online documentation here:
Timewarrior Documentation Home

...

**Activity Digest: June 2016** 2016-07-07

The main focus for June is getting Timewarrior ready for an alpha, and subsequent beta release. The purpose of an alpha release is to gather feedback that guides the subsequent beta release. Timewarrior is a new project that introduces new concepts. This new functionality needs to be refined before a beta release.

The Timewarrior bug tracker is now open for business.

...

**Clog 1.3.0 Release** 2016-06-27

Clog 1.3.0 is released, with regular expression improvements, bug fixes, rule precedence and overlapping match support. This release is a recommended upgrade.

The release is immediately available as a source tarball clog-1.3.0.tar.gz.

Clog has a full set of online documentation.

# tasktools.org – collection of software

tasktools.org taskwarrior.org holidata.net flod.us About

## What is tasktools.org?

This is a toolshed, or workshop, for our software development. This is the infrastructure that supports the worldwide distributed development team that brings you Taskwarrior.

Tasktools gives you access to:

- Project status - below
- Answers - Q & A for all projects
- Jira - issue tracking
- Stash - repository management and browsing
- Tinderbox - Flod-based CI testing
- PiWik - traffic analysis

### Taskwarrior

2.5.1 Released task-2.5.1.tar.gz
2.6.0 Development

`git clone https://git.tasktools.org/scm/tm/task.git`

`brew install task`

Taskwarrior is a command-line todo list manager. It maintains a task list, allowing you to add/remove, and otherwise manipulate your tasks. Task has a rich set of subcommands that allow you to do sophisticated things. You'll find it has customizable reports, charts, GTD features, device synching, documentation, extensions, themes, holiday files and much more.

### Taskserver

1.1.0 Released taskd-1.1.0.tar.gz
1.2.0 Development

`git clone --recursive https://git.tasktools.org/scm/tm/taskd`

`brew install taskd`

The Taskserver is a lightweight, secure server providing multi-user, multi-client access to task data. This allows true syncing between desktop and mobile clients.

### VIT

1.2 Released vit-1.2.tar.gz
1.3 Development

`git clone https://git.tasktools.org/scm/ex/vit.git`

`brew install vit`

Vit is a lightweight, fast, curses-based front end to Taskwarrior.

### Tasksh

1.0.0 Released tasksh-1.0.0.tar.gz
1.1.0 Development

`git clone https://git.tasktools.org/scm/ex/tasksh.git`

`brew install tasksh`

Tasksh is a shell command that wraps Taskwarrior commands. It is intended to provide simpler Taskwarrior access, and add a few new features of its own. The project is new, bear with us please.

Tasksh replaces the built-in `shell` command of older releases, and the bundled `tasksh` program of version 2.3.0. The former was very limited and

### Timewarrior

1.0.0 Beta timew-1.0.0.beta1.tar.gz
1.0.0 Development

`git clone --recursive https://git.tasktools.org/scm/tm/timew`

Timewarrior is a command line time-tracking utility for use as a standalone tool, or integrated with Taskwarrior.

Visit the Timewarrior documentation home for full details.

### Clog

1.3.0 Released clog-1.3.0.tar.gz
1.4.0 Development

`git clone --recursive https://git.tasktools.org/scm/ut/clo`

`brew install clog`

Clog is a colorized log tail utility. It can spot patterns in an input stream and colorize or suppress the lines. It can also decorate the lines with time- or date-stamps.

Visit the Clog documentation home for full details.

# Timewarrior – Time tracking

TASKWARRIOR News Docs Download Support Tools

Here is the complete set of Timewarrior documentation.

**Beta**

Timewarrior is currently in beta release, which has all the features for 1.0.0, but will likely contain bugs which need to be found and fixed during the beta.

There are no binary packages yet. Please send us feedback, to help us improve Timewarrior.

# VIT – curses-based front end to Taskwarrior

tasktools.org taskwarrior.org holidata.net flod.us About

## What is tasktools.org?

This is a toolshed, or workshop, for our software development. This is the infrastructure that supports the worldwide distributed development team that brings you Taskwarrior.

Tasktools gives you access to:

- Project status - below
- Answers - Q & A for all projects
- Jira - issue tracking
- Stash - repository management and browsing
- Tinderbox - Flod-based CI testing
- PiWik - traffic analysis

### Taskwarrior

2.5.1 Released task-2.5.1.tar.gz
2.6.0 Development

```
git clone https://git.tasktools.org/scm/tm/task.git
```

```
brew install task
```

Taskwarrior is a command-line todo list manager. It maintains a task list, allowing you to add/remove, and otherwise manipulate your tasks. Task has a rich set of subcommands that allow you to do sophisticated things. You'll find it has customizable reports, charts, GTD features, device synching, documentation, extensions, themes, holiday files and much more.

### Taskserver

1.1.0 Released taskd-1.1.0.tar.gz
1.2.0 Development

```
git clone --recursive https://git.tasktools.org/scm/tm/taskd
```

```
brew install taskd
```

The Taskserver is a lightweight, secure server providing multi-user, multi-client access to task data. This allows true syncing between desktop and mobile clients.

### VIT

1.2 Released vit-1.2.tar.gz
1.3 Development

```
git clone https://git.tasktools.org/scm/ex/vit.git
```

```
brew install vit
```

Vit is a lightweight, fast, curses-based front end to Taskwarrior.

### Tasksh

1.0.0 Released tasksh-1.0.0.tar.gz
1.1.0 Development

```
git clone https://git.tasktools.org/scm/ex/tasksh.git
```

```
brew install tasksh
```

Tasksh is a shell command that wraps Taskwarrior commands. It is intended to provide simpler Taskwarrior access, and add a few new features of its own. The project is new, bear with us please.

Tasksh replaces the built-in `shell` command of older releases, and the bundled `tasksh` program of version 2.3.0. The former was very limited and

### Timewarrior

1.0.0 Beta timew-1.0.0.beta1.tar.gz
1.0.0 Development

```
git clone --recursive https://git.tasktools.org/scm/tm/timew
```

Timewarrior is a command line time-tracking utility for use as a standalone tool, or integrated with Taskwarrior.

Visit the Timewarrior documentation home for full details.

### Clog

1.3.0 Released clog-1.3.0.tar.gz
1.4.0 Development

```
git clone --recursive https://git.tasktools.org/scm/ut/clo
```

```
brew install clog
```

Clog is a colorized log tail utility. It can spot patterns in an input stream and colorize or suppress the lines. It can also decorate the lines with time- or date-stamps.

Visit the Clog documentation home for full details.

# Tasksh – Taskwarrior command wrapper

tasktools.org taskwarrior.org holidata.net flod.us About

### Timewarrior

1.0.0 Beta timew-1.0.0.beta1.tar.gz
1.0.0 Development

```
git clone --recursive https://git.tasktools.org/scm/tm/timew
```

Timewarrior is a command line time-tracking utility for use as a standalone tool, or integrated with Taskwarrior.

Visit the Timewarrior documentation home for full details.

### Clog

1.3.0 Released clog-1.3.0.tar.gz
1.4.0 Development

```
git clone --recursive https://git.tasktools.org/scm/ut/clo
```

```
brew install clog
```

Clog is a colorized log tail utility. It can spot patterns in an input stream and colorize or suppress the lines. It can also decorate the lines with time- or date-stamps.

Visit the Clog documentation home for full details.

# Clog – colorized log tail utility

```
$ clog < sample.txt
This line matches no rules.
This line has the word red, which will be colored red.
This line will be colored entirely blue. Or will it?

This line will be emphasized by being preceded and followed by blank lines.

This line matches no rules.
This line matches no rules.
$
```

# Vramsteg – CLI progress bar

```
$ vramsteg --help

Usage: vramsteg [options]

  -y, --style <name>          Style of bar rendering
  -l, --label <value>         Progress bar label
  -m, --min <value>           Equivalent to 0%
  -x, --max <value>           Equivalent to 100%
  -c, --current <value>       Current value of progress bar
  -p, --percentage            Show percentage
  -s, --start <value>         Start time epoch
  -w, --width <value>         Width of progress bar, default full width
  -n, --now                   Returns current time as epoch
  -r, --remove                Removes the progress bar
  -e, --elapsed               Show elapsed time (needs --start)
  -t, --estimate              Show estimated remaining time (needs --start)
  -v, --version               Show vramsteg version
  -h, --help                  Show command options

Supported styles are:
  (default)     label                                    40%
  mono          label                                    20%
  text          label [************          ] 60%
```

# Anomaly – Data anomaly detection utility

tasktools.org taskwarrior.org holidata.net flod.us About

# holidata.net – holiday data for several countries

## Data

Holidata.net is a no-nonsense, ad-free provider of international holiday data under a Creative Commons License.

See the map of supported countries, and the supported Locales, years and formats.

## How to access the data

All you need to access the data is the correct URL, which looks like this:

http://holidata.net/ <LOCALE> / <YEAR> . <FORMAT>

Here is an example that requests the 2016 holiday data for the en-US locale:

http://holidata.net/en-US/2016.json

- The locale should be one of the supported locales (see the supported Locales, years and formats).
- The year should be a four-digit value no earlier than 2011.
- The data format should be one of: CSV, XML, YAML, JSON.

## Contact

**News**
Follow holidata.net updates and announcements on Twitter.

**Göteborg Bit Factory**
GBF is the creator of holidata.net.

**Taskwarrior**
Taskwarrior is an open source GTD task management application that relies on holidata.net.

**Errors**

| rbjorklin | When setting up taskd with TLS do I need to sign the client certificate with the same CA as the server certificate? | 1:48 am |
| jrabbit | it needs tobe the ca you configure with taskd | 1:50 am |
| | simple answer yes | 1:51 am |
| rbjorklin | So if I get a proper certificate from Let's Encrypt for the server that would mean I need Let's encrypt certificate for the client as well? | 1:51 am |
| jrabbit | no you'd use a seflsigned ca | 1:52 am |
| | the server cert doesnt need to match the ca | 1:52 am |
| rbjorklin | Thanks! | 1:53 am |
| | However that puts me back at square one on debuging my "Handshake failed. Error in the certificate." | 1:54 am |
| | Does the certificate CN have to match something particular for the client? | 2:24 am |
| pbeckingham | rbjorklin: Let's Encrypt certs don't work. We don't know why. Yes, the CN matters. See: https://git.tasktools.org/projects/ST/repos/gui... | 4:40 am |
| task-git | *** Timewarrior - commit 64cf3fa in "1.0.0", Paul Beckingham: CmdHelp: Added extension list to the 'help' command | 4:40 am |
| | *** Timewarrior - commit 935145e in "1.0.0", Paul Beckingham: Rules: Typo | 4:40 am |
| rbjorklin | pbeckingham: Thanks, tried the self-signed and got it working straigt away | 7:07 am |
| pbeckingham | rbjorklin: Good news. | 7:07 am |
| rbjorklin | s/straigt/straight/ | 7:07 am |
| task-git | *** Timewarrior - commit eb50862 in "1.0.0", Paul Beckingham: WWW-12: yesterday tag not recognised | 3:11 pm |
