FrOSCon 2016

Content

Introduction

The Universe

Dirk Deimeke (that's me)

- ▶ Born 1968 in Wanne-Eickel
- ▶ Linux since 1996
- ▶ Emigrated 2008 to Switzerland
- ▶ Taskwarrior Team since 2010

Entry point for more <https://d5e.org/>

What the heck?

Why give a talk about the *Universe* of a task management application?

The answer is simple: Because there is so much more to explore apart from the flagship application Taskwarrior.

We have many more applications and an interesting ecosystem of tools and services.

What the heck?

Why give a talk about the *Universe* of a task management application?

The answer is simple: Because there is so much more to explore apart from the flagship application Taskwarrior.

We have many more applications and an interesting ecosystem of tools and services.

Activity Digest: June 2016 2016-07-07

The main focus for June is getting **Timewarrior** ready for an alpha, and subsequent beta release. The purpose of an alpha release is to gather feedback that guides the subsequent beta release. Timewarrior is a new project that introduces new concepts. This new functionality needs to be refined before a beta release.

The **Timewarrior bug tracker** is now open for business.

...

Clog 1.3.0 Release 2016-06-27

Clog 1.3.0 is released, with regular expression improvements, bug fixes, rule precedence and overlapping match support. This release is a recommended upgrade.

The release is immediately available as a source tarball [clog-1.3.0.tar.gz](#).

Clog has a full set of [online documentation](#).

Tasktools bug system

Yesterday

Paul Beckingham resolved **WWW-12** - yesterday tag not recognised as 'Fixed'
Thank you!

Yesterday at 22:08

Michel Crucifix commented on **WWW-12** - yesterday tag not recognised
in the man page, under the section "timew continue"

Yesterday at 21:55

Paul Beckingham closed **TW-4839** - bash completion grep issue
Change already in place. Thank you for reporting this though.

Yesterday at 11:34

Arthur Noel commented on **TW-4839** - bash completion grep issue
Ah, was looking at master. Cheers.

Yesterday at 11:21

Paul Beckingham commented on **TI-32** - taskwarrior hook script doesn't stop recording waiting task
That's a good idea, it also needs to resume when the wait time is over.

Yesterday at 03:16

Paul Beckingham added the Fix Version 'backlog' to **TI-32** - taskwarrior hook script doesn't stop recording waiting task

tasktools.org – collection of software

tasktools.org taskwarrior.org holidata.net flod.us

ABOUT

What is tasktools.org?

This is a toolshed, or workshop, for our software development. This is the infrastructure that supports the worldwide distributed development team that brings you [Taskwarrior](#).

Tasktools gives you access to:

- Project status - below
- [Answers](#) - Q & A for all projects
- [Jira](#) - issue tracking
- [Stash](#) - repository management and browsing
- [Tinderbox](#) - Flod-based CI testing
- [PMMK](#) - traffic analysis

Taskwarrior

2.5.1 Released [task-2.5.1.tar.gz](#)
2.6.0 Development

```
git clone https://git.tasktools.org/scm/tm/task.git
```

```
brew install task
```

Taskwarrior is a command-line todo list manager. It maintains a task list, allowing you to add/remove, and otherwise manipulate your tasks. Task has a rich set of subcommands that allow you to do sophisticated things. You'll find it has customizable reports, charts, GTD features, device syncing, documentation, extensions, themes, holiday files and much more.

Tasksh

1.0.0 Released [tasksh-1.0.0.tar.gz](#)
1.1.0 Development

```
git clone https://git.tasktools.org/scm/es/tasksh.git
```

```
brew install tasksh
```

Tasksh is a shell command that wraps Taskwarrior commands. It is intended to provide simpler Taskwarrior access, and add a few new features of its own. The project is new, bear with us please.

Tasksh replaces the built-in `shell` command of older releases, and the bundled `tasksh` program of version 2.3.0. The former was very limited and

Taskserver

1.1.0 Released [taskd-1.1.0.tar.gz](#)
1.2.0 Development

```
git clone --recursive https://git.tasktools.org/scm/tm/taskd git clone https://git.tasktools.org/scm/es/vit.git
```

```
brew install taskd
```

The Taskserver is a lightweight, secure server providing multi-user, multi-client access to task data. This allows true syncing between desktop and mobile clients.

Timewarrior

1.0.0 Beta [timew-1.0.0.beta1.tar.gz](#)
1.0.0 Development

```
git clone --recursive https://git.tasktools.org/scm/tm/timew git clone --recursive https://git.tasktools.org/scm/es/clog
```

Timewarrior is a command line time-tracking utility for use as a standalone tool, or integrated with Taskwarrior.

Visit the [Timewarrior documentation home](#) for full details.

VIT

1.2.0 Released [vit-1.2.tar.gz](#)
1.3.0 Development

```
git clone https://git.tasktools.org/scm/es/vit.git
```

```
brew install vit
```

Vit is a lightweight, fast, curses-based front end to Taskwarrior.

Clog

1.3.0 Released [clog-1.3.0.tar.gz](#)
1.4.0 Development

```
brew install clog
```

Clog is a colored log tail utility. It can spot patterns in an input stream and colorize or suppress the lines. It can also decorate the lines with time- or date-stamps.

Visit the [Clog documentation home](#) for full details.

VIT – curses-based front end to Taskwarrior

tasktools.org taskwarrior.org holidata.net flod.us

ABOUT

What is tasktools.org?

This is a toolshed, or workshop, for our software development. This is the infrastructure that supports the worldwide distributed development team that brings you [Taskwarrior](#).

Tasktools gives you access to:

- Project status - below
- [Answers](#) - Q & A for all projects
- [Jira](#) - issue tracking
- [Stash](#) - repository management and browsing
- [Tinderbox](#) - Flod-based CI testing
- [PMMK](#) - traffic analysis

Taskwarrior

2.5.1 Released [task-2.5.1.tar.gz](#)
2.6.0 Development

`git clone https://git.tasktools.org/scm/tm/task.git`

`brew install task`

Taskwarrior is a command-line todo list manager. It maintains a task list, allowing you to add/remove, and otherwise manipulate your tasks. Task has a rich set of subcommands that allow you to do sophisticated things. You'll find it has customizable reports, charts, GTD features, device syncing, documentation, extensions, themes, holiday files and much more.

Tasksh

1.0.0 Released [tasksh-1.0.0.tar.gz](#)
1.1.0 Development

`git clone https://git.tasktools.org/scm/es/tasksh.git`

`brew install tasksh`

Tasksh is a shell command that wraps Taskwarrior commands. It is intended to provide simpler Taskwarrior access, and add a few new features of its own. The project is new, bear with us please.

Tasksh replaces the built-in `shell` command of older releases, and the bundled `tasksh` program of version 2.3.0. The former was very limited and

Taskserver

1.1.0 Released [taskd-1.1.0.tar.gz](#)
1.2.0 Development

`git clone --recursive https://git.tasktools.org/scm/tm/taskd.git` `git clone https://git.tasktools.org/scm/es/vit.git`

`brew install taskd`

The Taskserver is a lightweight, secure server providing multi-user, multi-client access to task data. This allows true syncing between desktop and mobile clients.

Timewarrior

1.0.0 Beta [timew-1.0.0.beta1.tar.gz](#)
1.0.0 Development

`git clone --recursive https://git.tasktools.org/scm/tm/timew.git` `git clone --recursive https://git.tasktools.org/scm/es/clog`

Timewarrior is a command line time-tracking utility for use as a standalone tool, or integrated with Taskwarrior.

Visit the [Timewarrior documentation home](#) for full details.

VIT

1.2.0 Released [vit-1.2.tar.gz](#)
1.3.0 Development

`git clone https://git.tasktools.org/scm/es/vit.git`

`brew install vit`

Vit is a lightweight, fast, curses-based front end to Taskwarrior.

Clog

1.3.0 Released [clog-1.3.0.tar.gz](#)
1.4.0 Development

`brew install clog`

Clog is a colored log tail utility. It can spot patterns in an input stream and colorize or suppress the lines. It can also decorate the lines with time- or date-stamps.

Visit the [Clog documentation home](#) for full details.

Tasksh – Taskwarrior command wrapper

tasktools.org taskwarrior.org holidata.net flod.us

[About](#)

What is tasktools.org?

This is a toolshed, or workshop, for our software development. This is the infrastructure that supports the worldwide distributed development team that brings you [Taskwarrior](#).

Tasktools gives you access to:

- Project status - below
- [Answers](#) - Q & A for all projects
- [Jira](#) - issue tracking

Taskwarrior

2.5.1 Released [task-2.5.1.tar.gz](#)
2.6.0 Development

```
git clone https://git.tasktools.org/scm/tm/task.git
```

```
brew install task
```

Taskwarrior is a command-line todo list manager. It maintains a task list, allowing you to add/remove, and otherwise manipulate your tasks. Task has a rich set of subcommands that allow you to do sophisticated things. You'll find it has customizable reports, charts, GTD features, device syncing, documentation, extensions, themes, holiday files and much more.

Tasksh

1.0.0 Released [tasksh-1.0.0.tar.gz](#)
1.1.0 Development

```
git clone https://git.tasktools.org/scm/ex/tasksh.git
```

```
brew install tasksh
```

Tasksh is a shell command that wraps Taskwarrior commands. It is intended to provide simpler Taskwarrior access, and add a few new features of its own. The project is new, bear with us please.

Tasksh replaces the built-in `shell` command of older releases, and the bundled `tasksh` program of version 2.3.0. The former was very limited and

Taskserver

1.1.0 Released [taskd-1.1.0.tar.gz](#)
1.2.0 Development

```
git clone --recursive https://git.tasktools.org/scm/tm/taskd git clone https://git.tasktools.org/scm/ex/vit.git
```

```
brew install taskd
```

The Taskserver is a lightweight, secure server providing multi-user, multi-client access to task data. This allows true syncing between desktop and mobile clients.

Timewarrior

1.0.0 Beta [timew-1.0.0.beta1.tar.gz](#)
1.0.0 Development

```
git clone --recursive https://git.tasktools.org/scm/tm/timew git clone --recursive https://git.tasktools.org/scm/ex/clog
```

Timewarrior is a command line time-tracking utility for use as a standalone tool, or integrated with Taskwarrior.

Visit the [Timewarrior documentation home](#) for full details.

VIT

1.2.0 Released [vit-1.2.tar.gz](#)
1.3.0 Development

```
git clone https://git.tasktools.org/scm/ex/vit.git
```

```
brew install vit
```

Vit is a lightweight, fast, curses-based front end to Taskwarrior.

Clog

1.3.0 Released [clog-1.3.0.tar.gz](#)
1.4.0 Development

```
brew install clog
```

Clog is a colored log tail utility. It can spot patterns in an input stream and colorize or suppress the lines. It can also decorate the lines with time- or date-stamps.

Visit the [Clog documentation home](#) for full details.

Clog – colorized log tail utility

```
$ clog < sample.txt
This line matches no rules.
This line has the word red, which will be colored red.
This line will be colored entirely blue. Or will it?

This line will be emphasized by being preceded and followed by blank lines.

This line matches no rules.
This line matches no rules.
$
```

Vramsteg – CLI progress bar

```
$ vramsteg --help
```

```
Usage: vramsteg [options]
```

-y, --style <name>	Style of bar rendering
-l, --label <value>	Progress bar label
-m, --min <value>	Equivalent to 0%
-x, --max <value>	Equivalent to 100%
-c, --current <value>	Current value of progress bar
-p, --percentage	Show percentage
-s, --start <value>	Start time epoch
-w, --width <value>	Width of progress bar, default full width
-n, --now	Returns current time as epoch
-r, --remove	Removes the progress bar
-e, --elapsed	Show elapsed time (needs --start)
-t, --estimate	Show estimated remaining time (needs --start)
-v, --version	Show vramsteg version
-h, --help	Show command options

```
Supported styles are:
```

(default)	label		40%
mono	label		20%
text	label	[*****]	60%

holidata.net – holiday data for several countries

Data

Holidata.net is a no-nonsense, ad-free provider of international holiday data under a [Creative Commons License](#).

See the map of [supported countries](#), and the [supported locales, years and formats](#).

How to access the data

All you need to access the data is the correct URL, which looks like this:

`http://holidata.net/<LOCALE>/<YEAR>.<FORMAT>`

Here is an example that requests the 2016 holiday data for the en-US locale:

<http://holidata.net/en-US/2016.json>

- The locale should be one of the supported locales (see the [supported locales, years and formats](#)).
- The year should be a four-digit value no earlier than 2011.
- The data format should be one of [CSV](#), [XML](#), [YAML](#), [JSON](#).

When setting up taskd with TLS do I need to sign the client certificate with the same CA as the server certificate?

jrabbit

It needs to be the ca you configure with taskd

rbjorklin

simple answer yes

rbjorklin

So if I get a proper certificate from Let's Encrypt for the server that would mean I need Let's Encrypt certificate for the client as well?

jrabbit

no you'd use a selfsigned ca

rbjorklin

the server cert doesn't need to match the ca

rbjorklin

Thanks!

rbjorklin

However that puts me back at square one on debugging my "Handshake failed. Error in the certificate."

rbjorklin

Does the certificate CN have to match something particular for the client?

pbeckingham

rbjorklin: Let's Encrypt certs don't work. We don't know why. Yes, the CN matters. See: <https://git.tasktools.org/projects/ST/repos/gui...>

rbjorklin

pbeckingham: Thanks, tried the self-signed and got it working straight away

pbeckingham

rbjorklin: Good news.

rbjorklin

s/straight/straight/
