### Activity Stream

#### Tasktools bug system

Today

**Dmitriy Bogdanov** created TW-1786 - Project name can't start with 'project'

An error is reported if a project name starts with "project":

```
$ task add project:projecttest Test
The expression could not be evaluated.
```

It's also happens with 'modify' command

```
$ task 1 modify project:project_test
```

# git.tasktools.org – repository management

**Stash** [Projects](#) [Repositories ▾](#)  [Log In](#)

## Projects

Project	Key	Description
<a href="#">Extensions</a>	EX	Third party extensions to taskwarrior that we provide git repository hosting for.
<a href="#">Sites</a>	ST	The source of our different projects' homepages.
<a href="#">Task Management</a>	TM	Our two main projects, taskwarrior aka task and task sync server aka taskd.
<a href="#">Testing</a>	TS	Our own C.I. (continuous integration) system FLOD.
<a href="#">Utilities</a>	UT	Our own small utility applications and libraries.

### Getting started

All the information you need to get started in Stash.

### Branching and forking

Learn about Git workflows for Enterprise teams.

### API

Customise Stash via the API and plugin framework.

Git repository management for enterprise teams powered by Atlassian Stash

# tasktools.org – collection of software

[tasktools.org](#) [taskwarrior.org](#) [holidata.net](#) [flod.us](#)

[About](#)

## What is tasktools.org?

This is a toolshed, or workshop, for our software development. This is the infrastructure that supports the worldwide distributed development team that brings you [Taskwarrior](#).

Tasktools gives you access to:

- Project status - below
- [Answers](#) - Q & A for all projects
- [Jira](#) - issue tracking
- [Slash](#) - repository management and browsing
- [Tinderbox](#) - Flod-based CI testing
- [PiWik](#) - traffic analysis

## Taskwarrior

**2.5.1** Released [task-2.5.1.tar.gz](#)  
**2.6.0** Development

```
git clone https://git.tasktools.org/scm/tm/task.git
```

```
brew install task
```

Taskwarrior is a command-line todo list manager. It maintains a task list, allowing you to add/remove, and otherwise manipulate your tasks. Task has a rich set of subcommands that allow you to do sophisticated things. You'll find it has customizable reports, charts, GTD features, device synching, documentation, extensions.

## Taskserver

**1.1.0** Released [taskd-1.1.0.tar.gz](#)  
**1.2.0** Development

```
git clone https://git.tasktools.org/scm/tm/taskd.git
```

```
brew install taskd
```

The Taskserver is a lightweight, secure server providing multi-user, multi-client access to task data. This allows true syncing between desktop and mobile clients.

## VIT

**1.2** Released [vit-1.2.tar.gz](#)  
**1.3** Development

```
git clone https://git.tasktools.org/scm/ex/vit.git
```

```
brew install vit
```

Vit is a lightweight, fast, curses-based front end to Taskwarrior.

tasksh	1.1.0 1.0.0 0.9.0
vramsteg	1.1.1
libshared	master
timewarrior	master

# holidata.net – holiday data for several countries

## Data

Holidata.net is a no-nonsense, ad-free provider of international holiday data under a [Creative Commons License](#).

See the map of [supported countries](#), and the [supported Locales, years and formats](#).

## How to access the data

All you need to access the data is the correct URL, which looks like this:

`http://holidata.net/ <LOCALE> / <YEAR> . <FORMAT>`

Here is an example that requests the 2016 holiday data for the en-US locale:

<http://holidata.net/en-US/2016.json>

- The locale should be one of the supported locales (see the [supported Locales, years and formats](#)).
- The year should be a four-digit value no earlier than 2011.
- The data format should be one of: [CSV](#), [XML](#), [YAML](#), [JSON](#).

## Contact

### News

Follow holidata.net updates and announcements on [Twitter](#).

### Göteborg Bit Factory

[GBF](#) is the creator of holidata.net.

### Taskwarrior

[Taskwarrior](#) is an open source GTD task management application that relies on holidata.net.

### Errors

See a problem in the data? [Please report it](#).

### Locale

Need a different locale? [Tell us](#).

### Format

Need a different data format? [Tell us](#).

### Disclaimer

See our legal [disclaimer](#).

\*\*\* Timewarrior - commit 2f818b4 in "HEAD", Paul Beckingham: Interval: Added ::summarize

\*\*\* Timewarrior - commit aed0933 in "HEAD", Paul Beckingham: CmdStart: Added user feedback

\*\*\* Timewarrior - commit 3f931c9 in "HEAD", Paul Beckingham: CmdStop: Added user feedback

\*\*\* Timewarrior - commit fb6b33c in "HEAD", Paul Beckingham: Build: Changed library order

pbeckingham: I'm interested

we'll see

I always have trouble getting the taskwarrior app to sync for the first time

hehe

maybe I should stop using adb push to install the config/certs

:P

tbabej

ackthet: adb push seems fine, as long as the perms are right

ackthet

should be

config is exactly the same as on my other devices but I get errors

I'll fiddle with it and get it working
